DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,21-24 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Schaffer et al (USPN 4,684,367). Schaffer discloses a pressure infuser bag (11A) for applying pressure to an infusate bag (1). The device also includes a plurality of pump modules (12 and 21) for inflating the pressure infuser bag. It is considered inherent that the pump modules (12 and 21) are removable at the connector (23) since any component in a fluid line is removable if one so chooses, e.g. removable if malfunctioning.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-14 and 25-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schaffer. Schaffer meets the claim limitations as described above including a plurality of coupler mechanisms (23 and T-fitting into the infuser bag). Schaffer does not teach a motorized pump module.

Application/Control Number: 10/788,945 Page 3

Art Unit: 3763

However, at the time of the invention, it would have been obvious to substitute a motorized pump module for the gas cartridge (12). The gas cartridge and a motorized pump would provide the same function, i.e. constant pressure in the infuser bag. The motivation for the incorporation would have been in order to provide an alternate pumping mechanism that would not run out like the cartridge and thereby enhancing the safety of the device.

Claims 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schaffer (103 rejection above) in view of Laing (USPN 5,059,182). Schaffer meets the claim limitations as described above for claims 2-14 and 25-28 but fails to teach a pressure relief valve.

However, Laing discloses a modular pressure infusion apparatus that includes a pressure relief valve (142) in combination with a pressure gauge (144) for indicating the pressure in the infuser bag. The pressure gauge has indicia for indicating the pressure in the bag, i.e. 100, 200, 300 mmHg.

At the time of the invention, it would have been obvious to incorporate the pressure relief valve of Laing into the invention of Schaffer with the pressure gauge of Schaffer. Both device are analogous in the art of modular pressure infuser apparatuses; therefore, a combination it proper. Additionally, the motivation for making the incorporation would have been in order to enhance the safety of the device to the patient.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Catherine S. Williams whose telephone number is 571-272-4970. The examiner can normally be reached on Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nicholas D. Lucchesi can be reached on 571-272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
